EDUCATION

Bachelor of Computer Science and Engineering   2022 - 2026(expected)

NorthCap University   7.4(current)

SKILLS

Languages	C/C++, Go(novice), JAVA and JavaScript
Technologies	HTML, CSS and canva
Expertise Area	Frontend Development, Problem Solving

PROJECTS

Metro App   Nov 23 - Dec 23

- The program provides an interactive command-line interface for the user to select these options and interact with the metro graph effectively. The user can choose any of the operations based on their requirements and explore the metro graph's details and connections including following:
- Displaying the list of metro stations in the graph.
- Showing the metro map with station connections.
- Finding the shortest distance between two metro stations along with the cost of travel.
- Finding the shortest time to reach between two metro stations.
- Access github: here

Personal Portfolio   June 23 - present

- Built my own personal portfolio to showcase and provide an online presence to my journey
- Tech Stack Used: HTML, CSS and JavaScript
- Access website: here

Sorting Visualizer   Nov 23 - Dec 23

- Built a Sorting visualizer to observe the working of bubble sort algorithm and see how element bubble up to their correct positions.
- Tech Stack Used: HTML, CSS, JavaScript
- Access Github: here

EXTRA-CURRICULAR ACTIVITIES

- Codechef   Rating 1252
- Codeforces   Rating 751
- 150+ questions solved on various platforms including Leetcode, Codechef and GFG

POSITION OF RESPONSIBILITY

- Member of website development team of Annual fest
